TECHNOLOGY SUPPORT

El Monte Union High

Seventy six percent of teachers at schools that use Clarity agree that technology use can enhance student learning and that learning is more engaging with the use of technology.

High quality, speedy, educative technology support is the catalyst for teachers trying new instructional techniques that employ technology. These environmental factors can overcome the lack of confidence that teachers have with technology, as expressed in a 2012 LEAD Commission National survey, in which 82 percent of teachers feel they have not received the necessary training to use technology to its fullest potential in the classroom.

However, adequate technology support can assuage teachers' trepidations. Teachers who perceive that the quality of technology support is high are more likely to try new lessons or learning activities with technology. This is because they feel confident that someone will be able to help them if a problem or disruption occurs. Seventy six percent of teachers at schools that use Clarity agree that technology use can enhance student learning and that learning is more engaging with the use of technology.

Furthermore, organizations can multiply teachers' access to technology support through the use of student technology support teams. An article in Educational Leadership notes that involving students in teaching technology to their teachers engages "students' innate interest in technology [and] enables teachers to contextualize technology."

High quality, speedy technology support is a requisite environmental factor needed to cultivate classrooms that support 21st Century Learning.

Schools	Date Range	Speed of Support	Quality of Support	Computer Quality
